Art Unit: 1621

**DETAILED ACTION*****Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 28, 32, 36 and 42 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2 and 29 of prior U.S. Patent No. 6,756,411. This is a double patenting rejection.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29, 30, 31 33-34, 35, 37-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29

Art Unit: 1621

of U.S. Patent No. 6,756,411 in view of Arhancet (USPN 5,304,691). Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of claims 29, 30, 32-44, 36 and 41 are all recited as a dependent claims in US patent No. 6,756,411. For instance different functional groups of claim 29 disclosed in claim 7, line 9, claims 34 and 41 are directed to hydroformylation temperature, which is a conventional temperature that is being carried out for the hydroformylation process. The instant claims further differ in using a cobalt catalyst wherein the ligand thereof is 9-phosphabicyclo [4,2,1] nonane. However, Arhancet teaches a cobalt catalyst wherein the ligand thereof is 9-phosphabicyclo [4,2,1] nonane. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made using a cobalt catalyst wherein the ligand thereof is 9-phosphabicyclo [4,2,1] nonane for the purpose of the hydroformylation reaction (see example 1-13).
